

API Design Standards

Document ID:	ADD-API-v4.0
Version:	4.0 Production
Status:	Approved for implementation
Effective date:	2026-05-24
Classification:	Internal - Build team

1. Protocol

Rule	Value
Style	REST over HTTPS
TLS	1.2 minimum (NFR3)
Base path	/api/v1
Content-Type	application/json; UTF-8
Date/time	ISO 8601 UTC
Money	Decimal 2 places; USD default

2. Contract authority

Endpoint paths, methods, and requirement mapping: API-REST-Contract-Specification-v4.0.pdf (authoritative). Do not implement endpoints not listed there without change control.

3. Authentication and authorization

- Authorization: Bearer JWT from POST /api/v1/auth/login

- Roles: cust

4. HTTP conventions

- 201 Created with Location header on resource create

- 204 No Co

5. Versioning

URL version /api/v1; breaking changes require /api/v2 and parallel support period.
