

Quality Assurance Plan

Document ID:	QAP-v4.0
Version:	4.0 Production
Status:	Approved for implementation
Effective date:	2026-05-24
Classification:	Internal - Build team

Document control

Version 4.0 Production | Effective 2026-05-24 | Supersedes all v3.x markdown sources. Cross-references use deliverables/ paths only.

Test Data and Environment Specification

Supports QA gates C3 in implementation; spec-complete for build handoff.

1. Test environments

Env	URL pattern	Gateway	Email
QA	https://qa.titansinstafood.example...	sandbox	Mailcatcher
Staging	https://staging.titansinstafood.example	sandbox	sandbox inbox

2. Seed personas

Persona	Username	Role	Purpose
customer_a	customer.a@test.example	customer	Happy path orders
customer_b	customer.b@test.example	customer	Empty history (FR4 edge)
admin_1	admin@test.example	admin	Menu, reports
staff_1	staff@test.example	staff	Order processing
driver_1	driver@test.example	driver	Delivery (when enabled)

3. Seed menu (FR24 categories)

CategoryCode	Sample items
BREAKFAST	Classic Breakfast, Pancake Stack
MEALS	Grilled Chicken, Burger Combo
SALADS	Caesar Salad, Garden Salad
SIDES	Fries, Coleslaw
PIZZA	Margherita, Pepperoni
MASHED_POTATOES	Regular Mash, Loaded Mash
DESSERTS	Brownie, Ice Cream

4. Seed orders

Order	Status	Customer	Tests
ORD-SEED-001	Completed	customer_a	FR18 history
ORD-SEED-002	Preparing	customer_a	FR17 status
ORD-SEED-003	Pending	customer_b	Payment timeout

5. Payment sandbox

Card	Result
Gateway doc test success PAN	Successful
Gateway doc decline PAN	Failed

6. Data reset

QA may reset DB from seed script in implementation repo before regression. Spec defines expected seed state above.

7. Traceability

NFR	Method	Pass criteria	Evidence artifact
NFR1	Manual + automated	Admin blocked without MFA	Screenshot + test report
NFR2	API integration test	Mutations create audit rows	Test log
NFR3	SSL Labs / scan	TLS 1.2+; no PAN in DB	Scan report
NFR4	k6/JMeter	100 VUs, p95 read < 500ms	Load test HTML
NFR5	30-day monitoring	>= 99.5% uptime	Uptime dashboard export
NFR6	Restore drill	RPO/RTO per SYSTEM_REQUIREMENTS	Ops sign-off memo
NFR7	BrowserStack manual	320-1920px layouts	Checklist PDF
NFR8	SUS survey	>= 68 mean	Survey results
NFR9	Click audit	<= 3 clicks primary path	UX checklist
NFR10	Webhook replay test	Idempotent handling	Integration test log
NFR11	Architecture review	Pooling documented	ADR in impl repo
NFR12	Load test	p95 per SRS-Software-Requirements	Specification-v4.0.pdf
NFR13	Stopwatch / automated	Dashboard <= 10s	Video or log
NFR14-17	Browser matrix	Smoke pass last 2 majors	Matrix spreadsheet
NFR18	Search benchmark	p95 <= 3s, 500 items	Benchmark log
NFR19	iOS devices	Smoke pass	Device lab notes
NFR20	axe + manual WCAG	No critical a11y violations	a11y report
NFR21	DR drill	Failover <= 60 min	Ops memo
